Application

For initial protective treatment

- Thoroughly vacuum and damp-wipe the floor beforehand.
- Rinse out the wiping mop thoroughly and wring until slightly damp.
- Apply 10 ml/m² of care agent and distribute evenly in sections using the damp mop.
- Allow the damp care film to dry completely (approx. 20–30 mins), then polish.

For regular maintenance on protected floors

- Vacuum the floor
- Add 30 ml/l to wiping water, wipe floor slightly damp, allow to dry and buff if required.

Instructions for use

- Allow treated floors to harden completely for 24 hours.
- Do not apply water or damp mop during the 24-hour hardening period.
- Do not move furniture or walk on the floor wearing shoes during hardening.
- Store away from frost.
