[1)] The Kärcher hard floor cleaners achieve up to 20% better cleaning performance compared to a conventional wiping mop with a wiping cloth cover in the "Wiping" test category. Refers to average test results for cleaning efficiency, dirt pick-up and edge cleaning. [2)] The Kärcher hard floor cleaners save up to 50% of the time required for cleaning, as hard floors can be cleaned in a single step when they are covered in normal household dirt, eliminating the need for vacuuming before mopping. [3)] When cleaning with direct contact with the surface to be cleaned, up to 99.9% of all common household bacteria on common household smooth hard surfaces are killed (test germ: Enterococcus hirae). According to the 4-field test (based on DIN EN 16615:2015-06). [4)] Sound pressure level compared to Kärcher FCV 3 and FCV 4 with 65 dB(A). Preceived volume doubles with a 10 dB(A) increase. Based on internal tests.
