Mains operation

Equipment

Suction motor: 800 W

Excellent suction power

- The applied water is reliably sucked back into the machine by the two powerful suction turbines together with four straight suction hoses and matching combs.
- Prevents water from dripping into the escalator shaft.

Suitable for escalators

- Combs which enter the grooves in the escalator provide the necessary vacuum.
- Different combs are available to suit different types of escalators. This ensures that the moisture is effectively vacuumed from the escalator.

Easy to stand up at the rear of the machine during operation

- For simple operation.
