SUSTAINABILITY ASPECTS OF K 5 FC
1.610-500.0

Sustainability aspects of Beyond Cleaning		
More features	Saving fresh water possible by using alternative water sources (e.g. wells, rain barrels, cisterns) / Lower water consumption: compared to a conventional garden hose, the pressure washer uses up to 80% less water.	Internal testing conditions: the pressure washer's flow rate is 40% of that of a garden hose, while cutting cleaning time in half. Flow rate and actual water and time savings vary depending on the device class, degree of soiling and location.
