Application

Spray method
The cleaning water is applied to the floor directly in front of the mop, then the surface is wiped.

Preconditioned method
For optimum results, dampen the mop with cleaning water amounting to 250 % of its own dead weight.

Bucket method
For optimal moisture and a single-step wiping process, dip the mop fully into the cleaning water, allow it to absorb as much water as possible and then wring it out in the press.

Properties

- Mop cloth with loops and fringe made of high-quality cotton
- With pockets
- Easy to wring out effectively
- Can be used with all conventional folding holders (40 cm)

Washing instructions

- Do not wash with other textiles
- Do not use bleach, softener or strongly alkaline detergents
- Washing or drying at high temperatures can damage the fibres
- Thoroughly rinse the textile before washing it

[1)] Compliance with or use of recommended temperatures and detergents. In addition, the use of a dryer, especially at higher temperatures, may reduce the lifetime considerably.
